

Introducing the all new ITS R32a range of pool heat pumps – get the most enjoyment from your pool....all year round.

ITS pool heating heat pumps are designed to make you get the most enjoyment from your pool. With pool temperatures programmable up to 40°C you can now swim all year round. No longer do you need to spend thousands of Rand on electricity. ITS heat pumps are compact, quiet and very simple to install. It will provide you with many years of trouble-free pool heating. ITS pool heat pumps use the latest in heat pump pool control technology resulting in extremely low operational costs. For every R1.00 worth of electricity this unit can give you more than R5.00 worth of output heat.

Key features

- Heat and **get the most enjoyment from your pool** all year round at a fraction of the cost of an electric heater.
- Uses **most energy efficient and environmentally friendly R32a gas** resulting in up to 75% reduction in GWP compared to R410a that is being phased out.
- **Titanium heat exchanger** provides superior corrosion resistance with 50mm standard coupling connections for easy installation.
- **Latest digital controller technology** with easy to use LCD touch screen.
- **Adds value to your home.**
- **Silent, compact and great value for money**
- **DIY installation possible for suitable skilled.**
- **Backed nationwide** by ITS branches.
- Limited extended **5 year Warranty.**

South Africa's leading **heat pump & solar water heating** supplier

Why heat your pool?

Building and maintaining a pool these days can be very costly. If one then can't use it for more than three months of the year because the water is simply too cold, it becomes a pretty poor investment. By using an ITS heat pump or Heliocol solar pool heating panels one can relax in a steaming hot pool, even in the middle of winter, or simply heat the water to a temperature where you and your family can get the most enjoyment from the pool.

Call us today to find out more about this amazing technology and how it stands out from the rest.
